

WRAPS WORKSHOP COMING SOON!

The Minnesota Soybean Research and Promotion Council and Houston Engineering, Inc. (HEI) are excited to announce new WRAPS Workshops taking place in your area! Get a full understanding of the WRAPS and TMDL process and how you can have a positive impact on the outcomes of this process.

Location:

**Melrose City Building, Meeting Room C 221
1st St. NE
Melrose, MN 56352**

Date:

Tuesday, November 28

Time:

10:00 am - 12:00 pm

Background on TMDL and WRAPS

The Clean Water Act (CWA) was enacted to attain “fishable and swimmable” waters, create a basic structure for managing pollution entering public waters, and set standards for water quality conditions. Different laws and requirements were born from the CWA, including TMDL and WRAPS. Learn how the WRAPS and TMDL process will soon be brought into a local water management plan that will operate in your community.

TMDL:

A Total Maximum Daily Load (TMDL) is a state process that sets a pollution diet for waters.

WRAPS:

The WRAPS (Watershed Restoration and Protection Strategy) document contains the strategies developed by local leaders and farmers to make progress towards achieving or keeping pollution diets. During the development of WRAPS, **landowners and farmers are given the opportunity to help develop these strategies. Join us to learn how!**

***Don't miss out on letting your voice be heard!
Attend these workshops to learn how you can take an active role in
developing water quality strategies in your area while promoting the
work you care about most!***
