Educational Products

Model plants

County organizations across the state are now able to check out MSR&PC's 3-D printed soybean plants. These are life-size displays of common weeds and diseases in soybeans.

Availble soybean plants are:
- Kochia
- Palmer amaranth
- Giant ragweed
- Waterhemp
- Sudden death syndrome
- White mold
- Brown stem rot

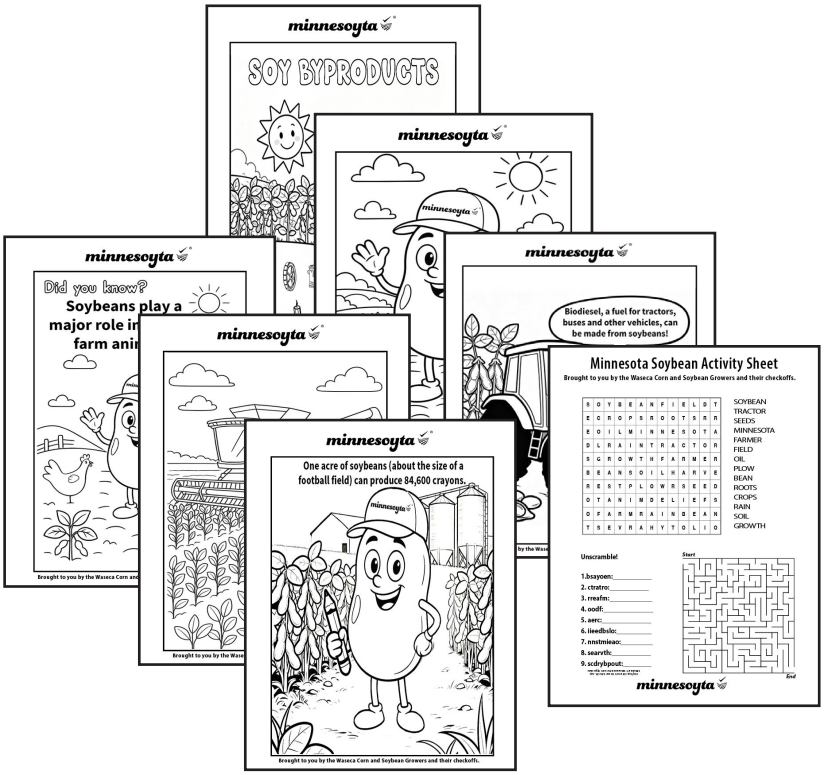

Soy house

Counties can also use the soy house, which shows common soy-based products used inside and during the home-building process.

Activity Pages

Coloring pages and an activity sheet are available for counties to order for events. Contact your representative for printed copies or for a pdf to print at home.

Important Guidelines for Ordering New Products

As you consider ordering new giveaway items or promotional products, keep the following guidelines in mind to ensure your purchases are eligible for reimbursement through the Minnesota Soybean Research & Promotion Council (MSR&PC).

MSR&PC Logo Requirement

All newly ordered products must feature the official MSR&PC logo to be considered reimbursable.
Even if a county-specific logo is included, the MSR&PC logo must also be present on the item.
This helps ensure brand consistency and meets state and national checkoff compliance standards.

Work with Your Soybean Representative

Before placing an order, we strongly encourage you to connect with your county's Minnesota Soybean representative. They can:

- Confirm product eligibility for reimbursement
- Help source and order products
- Make sure logos meet MSR&PC standards

Have a Product Idea?

If you have a specific product in mind, your soybean rep can help locate it through a vendor and make sure it's a good fit for outreach and reimbursement.

minnesoyta®
